CONTENTS OF VOLUME 29

PART 1 (March 1973)

A smooth population response curve based on an abrupt threshold and plateau model for individuals ..... R. N. Curnow 1
On the estimation of heteroscedastic variances ..... J. N. K. Rao 11
Testing group effects from Type II censored normal samples in experimental design ..... M. L. Tiku 25
The analysis of designed experiments with censored observations ..... J. Taylor 35
On Tukey's test of additivity ..... B. A. Rojas 45
Minimum mutation fits to a given tree ..... J. A. Hartigan 53
A note on the methodology of Knox's tests of "time and space interaction" ..... O. Abe 67
The effects of unequal catchability on Jolly-Seber estimates ..... A. D. Carothers 79
Optimum sample sizes for the comparison of the control and treatment ..... J. M. Nam 101
Tolerance limits for the distribution of the product and quotient of normal variates ..... I. J. Hall and C. B. Sampson 109
Regression toward the mean in uncontrolled clinical studies ..... K. E. James 121
The analysis of incomplete block designs as used in the group screening of drugs ..... M. A. Moran 131
An analysis for compounded functions of categorical data ..... R. N. Forthofer and G. G. Koch 143
Matching to remove bias in observational studies ..... D. B. Rubin 159
The use of matched sampling and regression adjustment to remove bias in observational studies ..... D. B. Rubin 185
The analysis of residuals in cross-classified tables ..... S. J. Haberman 205
Obituary: John Edward Walsh 221
Correspondence 223
Book Reviews 227
The Biometric Society 233
News and Announcements 236

PART 2 (June 1973)

Sample-based multinomial classification ..... N. Glick 241
A logistic-exponential model for use with response-time data involving regressor variables ..... M. H. Myers, B. F. Hankey, and N. Mantel 257
Correlation between the numbers of two types of children in a family ..... B. R. Rao, S. Mazumdar, J. H. Waller, and C. C. Li 271
Etude du phenomene de coincidence dans un compteur de type Coulter ..... J. R. Didry, A. German, and J. Maccario 281
Multiple-stage procedures for drug screening ..... J. R. Schultz, F. R. Nichol, G. L. Elfring, and S. D. Weed 293
A statistical test for measuring unimodal clustering: a description of the test and of its application to cases of acute leukemia in metropolitan Atlanta, Georgia ..... R. J. Larsen, C. L. Holmes, and C. W. Heath, Jr. 301
Quadratic estimation of variance components ..... L. R. LaMotte 311
Applications of some finite Markov chain theories to two locus selfing model with selection ..... W. Y. Tan 331
Apparentement et identite. Algorithme du calcul des coefficients d'identite ..... R. Nadot 347
Tolerance bands for growth curves ..... D. C. Bowden and R. K. Steinhorst 361
Some exact tests of hypotheses about Grubbs's estimators ..... G. K. Shukla 373

Notes
A simple derivation of the canonical correlation equations ..... E. M. Cramer 379
Theory and application of sampling on repeated occasions with several auxiliary variables ..... A. R. Sen 381
Estimation of the probability of post transfusion hepatitis in hemophilia treatment ..... C. E. Davis, J. E. Grizzle, and J. A. Bryan II 386
Self orthogonal Latin square designs and their importance ..... A. Hedayat 393
Beehive designs for observing variety competition ..... F. B. Martin 397
Simple approximations to the Poisson, binomial, and hypergeometric distributions ..... W. Molenaar 403
An improved quadratic estimator for variance components
A. Haile and J. T. Webster 408
Book Reviews 414
Abstracts 419
The Biometric Society 421
News and Announcements 426

PART 3 (September 1973)

Some further problems in the classification of human chromosomes
R. N. Curnow and M. F. Franklin 429
The determination of sample sizes for use with the exact conditional test in 2×2 comparative trials ..... M. H. Gail and J. J. Gart 441
Inferences on the parameters of the logistic distribution
R. E. Schafer and T. S. Sheffield 449
Weibull distributions for continuous-carcinogenesis experiments
R. Peto and P. Lee 457
Group sequential designs for clinical trials ..... G. L. Elfring and J. R. Schultz 471
Synthetic retrospective studies and related topics ..... N. Mantel 479
Animal life tables from capture-recapture data ..... B. F. J. Manly and G. A. F. Seber 487
Approximations of the bias in the Jolly-Seber capture-recapture model
R. O. Gilbert 501
The estimation of variance and covariance components with an application when records are subject to culling ..... R. Thompson 527
On a stepwise procedure for two population Bayes decision rules using discrete variables ..... J. M. Lachin 551
Extended complete block designs generated by BIBD
S. M. Trail and D. L. Weeks 565
Notes
Conservatism of the approximation $\Sigma(O-E)^2/E$ in the logrank test for survival data or tumor incidence data ..... R. Peto and M. C. Pike 579
Covariances between relatives due to sex-linked genes ..... J. W. James 584
On a model for studying variation in the family size under different sex preferences ..... K. B. Pathak 589
On a recent paper by Cook and Nassar ..... G. A. Watterson 595
Obituary: Edmund Alfred Cornish 601
Book Reviews 603
Abstracts 609

News and Announcements 620
Papers to be Published in Biometrics 622

PART 4 (December 1973)

What time to the baboons come down from the trees? (An estimation problem)
S. S. Wagner and S. A. Altmann 623

Maximum likelihood estimation for the beta-binomial distribution and an application to the household distribution of the total number of cases of a disease
D. A. Griffiths 637
A logistic reanalysis of Ashford and Sowden's data on respiratory symptoms in British coal miners ..... N. Mantel and C. Brown 649
The use of a semi-Markov model for describing sleep patterns
M. C. K. Yang and Carolyn J. Hursch 667
Analysis of tests of chemotherapeutic agents involving repeated drug treatment
Nelly S. Ullman and J. A. Jacquez 677
The estimation of relative potency from two parabolas in symmetric bioassays
D. A. Williams 695
A two locus haploid population with overlapping generations ..... A. C. Trajstman 701
Population and parameter estimation in the acoustic enumeration of a migrating fish population ..... G. E. Lord 713
A mathematical model for pest control ..... S. Chatterjee 727
Sur l'analyse statistique des reponses dichotomiques a un stimulus multidimensionnel
M. Meste 735
Le traitement des variables vectorielles ..... Y. Escoufier 751
A comparison of iterative maximum likelihood estimates of the parameters of a mixture of two normal distributions under three different types of sample
D. W. Hosmer, Jr. 761
Sampling experiments on the estimation of parameters in heteroscedastic linear regression ..... J. A. Jacquez and Marija Norusis 771
Maximum likelihood estimation for mixtures of two normal distributions
N. P. Dick and D. C. Bowden 781
Extensions of the successive screening method of classification
J. C. Reading and M. R. Klauber 791
Notes
Optimum age specific harvesting of a population
J. R. Beddington and D. B. Taylor 801
On a genetic inequality ..... E. Seneta 810
An approximate method of sampling a multinomial population. D. G. Pederson 814
Classification in the presence of constraints ..... A. D. Gordon 821
